FISHLOG
Electronic Catch Reporting Software

COMPLIANCE MADE EASY

FISHLog is state-of-the art reporting software that works across all devices: PCs, tablets, and smartphones. Any national or regional fisheries regulations can be integrated. Forget time-consuming and error-prone paper forms! In a few simple clicks, fishermen can submit their declarations. Administrators receive near real-time catch data, enabling better, faster quota management.

SYSTEM CAPABILITIES

Multi-platform software: works on Windows PCs and Android tablets and smartphones

Declarations can be transmitted via the VMS terminal through the Iridium satellite network or stored to send later
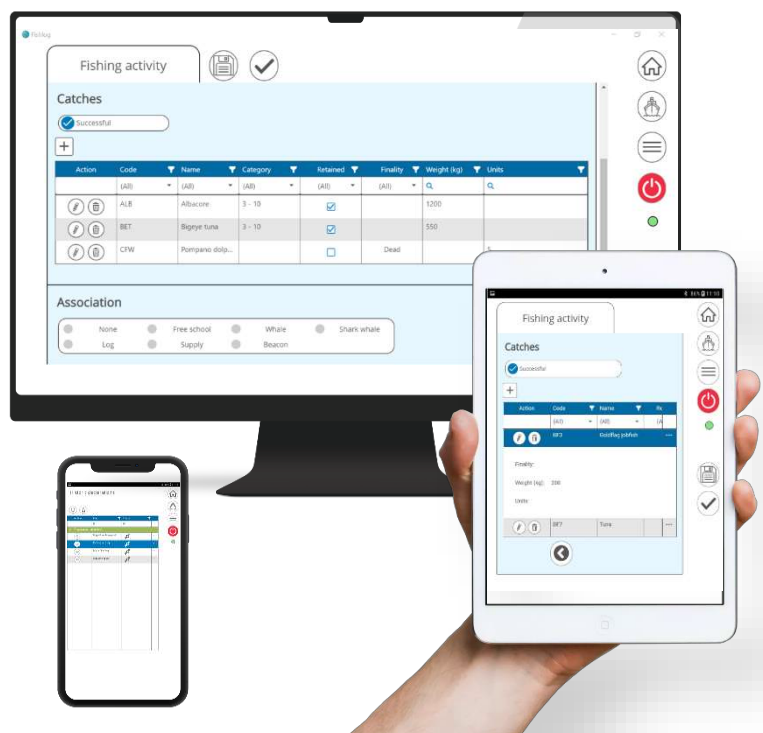

BENEFITS

Easy-to-use Interface

Built-In workflow makes it easy for captains to send declarations in the right order

Configurable for all languages

Logbook forms can be easily customized to meet any requirements or regulations
